

JavaScript Array & Loop Tasks — Answers

Tasks 1–15 | Complete JavaScript solutions

1. favApps using a for loop

```
const favApps = ["Instagram", "Zomato", "Paytm", "WhatsApp", "YouTube"];

for (let i = 0; i < favApps.length; i++) {
  console.log(favApps[i]);
}
```

2. favApps using a for loop

```
const favApps = ["Instagram", "Zomato", "Paytm", "WhatsApp", "YouTube"];

for (let i = 0; i < favApps.length; i++) {
  console.log(favApps[i]);
}
```

3. playlist using a for loop

```
const playlist = ["Kesariya", "Tum Hi Ho", "Apna Bana Le", "Chaleya", "Heeriye"];

for (let i = 0; i < playlist.length; i++) {
  console.log(playlist[i]);
}
```

4. IPL teams using a while loop

```
const teams = ["MI", "CSK", "RCB", "GT", "KKR", "SRH", "RR", "DC", "PBKS", "LSG"];

let i = 0;
while (i < teams.length) {
  console.log(teams[i].toUpperCase());
  i++;
}
```

5. IPL teams using a while loop

```
const teams = ["MI", "CSK", "RCB", "GT", "KKR", "SRH", "RR", "DC", "PBKS", "LSG"];

let i = 0;
while (i < teams.length) {
  console.log(teams[i].toUpperCase());
  i++;
}
```

6. Instagram usernames using a while loop

```
const usernames = ["divy123", "rahul_dev", "priya21", "techworld", "foodie_in"];

let i = 0;
while (i < usernames.length) {
  console.log(usernames[i].toUpperCase());
  i++;
}
```

7. playlist with index using a do-while loop

```
const playlist = ["Kesariya", "Tum Hi Ho", "Apna Bana Le", "Chaleya"];

let i = 0;
do {
  console.log(i + ": " + playlist[i]);
  i++;
} while (i < playlist.length);
```

8. playlist with index using a do-while loop

```
const playlist = ["Kesariya", "Tum Hi Ho", "Apna Bana Le", "Chaleya"];

let i = 0;
do {
  console.log(i + ": " + playlist[i]);
  i++;
} while (i < playlist.length);
```

9. Zomato order tracker using a do-while loop

```
const statuses = [
  "Preparing",
  "Out for delivery",
  "Delivered"
];

let i = 0;

do {
  console.log("Order status: " + statuses[i]);
  i++;
} while (i < statuses.length);
```

10. Flipkart product names using a for-of loop

```
const products = [
  { name: "Wireless Headphones", price: 1499 },
  { name: "Smart Watch", price: 2499 },
  { name: "Bluetooth Speaker", price: 1999 },
  { name: "USB Cable", price: 399 }
];

for (const product of products) {
  console.log(product.name);
}
```

11. Flipkart product names using a for-of loop

```
const products = [
  { name: "Wireless Headphones", price: 1499 },
  { name: "Smart Watch", price: 2499 },
  { name: "Bluetooth Speaker", price: 1999 },
  { name: "USB Cable", price: 399 }
];

for (const product of products) {
  console.log(product.name);
}
```

12. Total Flipkart product prices using a for-of loop

```
const prices = [1499, 2499, 1999, 399];

let total = 0;

for (const price of prices) {
  total += price;
}

console.log("Total price: ■" + total);
```

13. WhatsApp contacts using forEach and an arrow function

```
const contacts = ["Rahul", "Priya", "Aman", "Neha", "Riya"];

contacts.forEach((name) => {
  console.log("Sending hi to " + name + " on WhatsApp!");
});
```

14. WhatsApp contacts using forEach and an arrow function

```
const contacts = ["Rahul", "Priya", "Aman", "Neha", "Riya"];

contacts.forEach((name) => {
  console.log("Sending hi to " + name + " on WhatsApp!");
});
```

15. Cricket teams using forEach

```
const teams = ["MI", "CSK", "RCB", "GT"];

teams.forEach((team) => {
  console.log("Go " + team + "!");
});
```
