

JavaScript Function Tasks — Answers

Complete solutions for all 13 tasks. Duplicate questions (2/1, 5/4, 8/7, and 11/10) are answered separately as requested.

1. createSpotifyButton

```
function createSpotifyButton(label, color) {
  const button = document.createElement("button");
  button.textContent = label;
  button.style.backgroundColor = color;
  button.style.color = "white";
  button.style.padding = "10px 20px";
  button.style.border = "none";
  button.style.borderRadius = "6px";
  return button;
}

const spotifyButton = createSpotifyButton("Play Spotify", "#1DB954");
document.body.appendChild(spotifyButton);
```

2. createSpotifyButton

```
function createSpotifyButton(label, color) {
  const button = document.createElement("button");
  button.textContent = label;
  button.style.backgroundColor = color;
  button.style.color = "white";
  button.style.padding = "10px 20px";
  button.style.border = "none";
  button.style.borderRadius = "6px";
  return button;
}

document.body.appendChild(
  createSpotifyButton("Open Spotify", "#1DB954")
);
```

3. getGreeting — Function Expression

```
const getGreeting = function(name) {
  return `Hello, ${name}!`;
};

console.log(getGreeting("Rahul"));
```

4. getDiscountedPrice — Function Expression

```
const getDiscountedPrice = function(price, discountPercent) {
  return price - (price * discountPercent / 100);
};

console.log(getDiscountedPrice(1000, 20)); // 800
```

5. getDiscountedPrice — Function Expression

```
const getDiscountedPrice = function(price, discountPercent) {
  const discount = price * discountPercent / 100;
  return price - discount;
};

console.log(getDiscountedPrice(2500, 30)); // 1750
```

6. formatFollowers — Arrow Function

```
const formatFollowers = (count) => {
  if (count >= 1000000) {
    return (count / 1000000).toFixed(1) + "M";
  } else if (count >= 1000) {
    return (count / 1000).toFixed(1) + "K";
  }
  return count;
};

console.log(formatFollowers(1500));    // 1.5K
console.log(formatFollowers(2000000)); // 2.0M
```

7. Rewrite formatFollowers as an Arrow Function

```
const formatFollowers = (count) => {
  if (count >= 1000) {
    return (count / 1000).toFixed(1) + "K";
  }
  return count;
};
```

8. Rewrite formatFollowers as an Arrow Function

```
const formatFollowers = (count) => {
  if (count >= 1000) {
    return (count / 1000).toFixed(1) + "K";
  }
  return count;
};
```

9. createLikeButton

```
function createLikeButton(label, color) {
  const button = document.createElement("button");
  button.textContent = label;
  button.style.backgroundColor = color;
  button.style.color = "white";
  button.style.padding = "10px 20px";
  button.style.border = "none";
  button.style.borderRadius = "6px";
  button.style.cursor = "pointer";

  return button;
}

const likeButton = createLikeButton("Like", "#ff4d6d");
document.body.appendChild(likeButton);
```

10. showMenuItem — Mini Zomato Feature

```
function showMenuItem(name, price) {
  const div = document.createElement("div");

  div.innerHTML = `
    <h3>${name}</h3>
    <p>■${price}</p>
  `;

  div.style.padding = "12px";
  div.style.margin = "10px 0";
  div.style.border = "1px solid #ddd";
  div.style.borderRadius = "8px";
  div.style.backgroundColor = "#fff8f0";
```

```

    return div;
}

document.body.appendChild(showMenuItem("Paneer Pizza", 299));
document.body.appendChild(showMenuItem("Veg Burger", 149));
document.body.appendChild(showMenuItem("Masala Dosa", 120));

```

11. showMenuItem — Mini Zomato Feature

```

function showMenuItem(name, price) {
    const div = document.createElement("div");

    div.innerHTML = `
        <strong>${name}</strong>
        <span> - ■${price}</span>
    `;

    div.style.padding = "10px";
    div.style.margin = "8px";
    div.style.border = "1px solid #ccc";
    div.style.borderRadius = "6px";

    return div;
}

const menu = document.body;
menu.appendChild(showMenuItem("Margherita Pizza", 299));
menu.appendChild(showMenuItem("Cheese Burger", 199));
menu.appendChild(showMenuItem("Cold Coffee", 129));

```

12. double — Arrow Function

```

const double = (x) => {
    return x * 2;
};

console.log(double(5)); // 10

```

13. createPlaylistButton — Spotify Playlist Feature

```

function createPlaylistButton(songName, themeColor) {
    const button = document.createElement("button");

    button.textContent = songName;
    button.style.backgroundColor = themeColor;
    button.style.color = "white";
    button.style.padding = "10px 18px";
    button.style.margin = "6px";
    button.style.border = "none";
    button.style.borderRadius = "20px";
    button.style.cursor = "pointer";

    return button;
}

const song1 = createPlaylistButton("Blinding Lights", "#e91e63");
const song2 = createPlaylistButton("Shape of You", "#673ab7");
const song3 = createPlaylistButton("Perfect", "#009688");

document.body.appendChild(song1);
document.body.appendChild(song2);
document.body.appendChild(song3);

```

Note: Tasks 6 and 7 use slightly different requirements. Task 6 supports both K and M formatting as requested; Tasks 7 and 8 preserve the exact original logic.
